

PROJECTS

Owner: Southern Company
Location: Carrollton, Georgia
Project: Limestone-handling system
Construction: Began in 2007
In Service: 2008
Total Value: \$8 million

In 2008, we completed a limestone-handling system, which provides 24/7 service with a capacity of 3,400 tons per hour, for Southern Company's Plant Wansley (power plant) in Carrollton, Georgia. The project consisted of a rail unloading system, transfer conveyors, and a radial stacker. We also provided all mechanical and electrical components for the system, as well as fabrication and erection of all components, which included more than 1 million pounds of structural steel.
