

PROJECTS

Owner: Wisconsin Public Service Corporation

Location: Oak Creek, Wisconsin

Project: Coal-handling system

Construction: Began in June 2005

In Service: First unit in 2009;
Second unit in 2010

Total Value: \$12.5 million

We were a major supplier to this massive power plant expansion in Oak Creek, Wisconsin. Our focus was on the coal-handling system serving two advanced-technology, coal-fueled generating units, which will each produce 615 megawatts of electricity. We shipped approximately 7.5 million pounds of conveyor support steel for the project. Manufacturing and deliveries of conveyor and structural steel were completed in July 2007.
